Createspace, United States, 2014. Paperback. Book Condition: New. Sydney Zmitrewicz (illustrator). 216 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.What do clocks, calendars, and King Arthur have in common? If you said, the number twelve -you re right! In this innovative illustrated number concepts book, kids are introduced to more than just learning to count from zero to twelve. Numbers, Numbers, Everywhere! shows kids how numbers appear all around them in science, geography, history, literature-and even in the games they play. As the number increases, so does the amount of number-related facts. Kids learn about the months of the year, the planets, how many official languages South Africa has, and even about one of Shakespeare s sonnets! Parents may even learn some new information, too. While most counting books are only applicable for beginners, this book has the ability to grow along with young readers. Toddlers can appreciate the pictures and point out the images they know. As kids grow older, they can start to make connections between the facts and the illustrations. And eventually, you and your kids could come up with additional number-related facts-maybe even make your own book of numbers starting with thrilling thirteen!.
