Createspace, United States, 2013. Paperback. Book Condition: New. 230 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Roosters of the Apocalypse describes predictions of looming catastrophe from global warming as an apocalyptic prophecy with a scientific gloss, making it palatable to the modern mind. The book's title comes from Richard Landes's study of millennial movements: Landes calls those who crow an exciting new message demanding urgent action roosters. In this case, the action is to sacrifice fossil fuels, the lifeblood of our economy. Dire consequences do indeed loom as a result of climate change but they are economic and the book describes them: billions wasted on uneconomic green energy, millions forced into fuel poverty by green levies, jobs lost as industries are destroyed or forced abroad. The damage thus far is greatest in Europe, but the United States under President Obama, a committed climate rooster, is heading down the same path. Distinguished climatologist Richard Lindzen (professor of atmospheric science at MIT) has written the foreword: he notes that the book, appropriately in his view, places the current concern over climate in the realm of social anthropology rather than science.
