Trans.), and his experiments, with Keir, upon its effects when substituted for gunpowder in fire-arms, it has been recognised, that some explosive substances become gaseous with inconceivably greater rapidity than others; that, in fact, the word explosive merely expresses a vague relation between the volume of gas evolved from a solid or liquid, in changing its state by chemical or molecular action, and the time occupied in that change; so that the coal that slowly becomes water and carbonic acid, c, in our domestic fires, and the gases suddenly liberated from an ignited charge of gunpowder, are but extremes of a line of similar phenomena, connected in character, and differing mainly in rapidity. 240.
