Brand New Book ***** Print on Demand *****.The lack of agreement in public debate is appealing, from a realistic philosophical perspective. When people adhere to traditions, isn't that a way of falling back? These essays challenge this problem. They present a more contemporary model of explaining the evolution of the human brain, the I, and it also explains the link between biology and the thinking process. These essays also interpret history in terms of unstoppable social and societal trends, resulting in a contemporary postmodern laissez faire approach. In addition, it also provides a new impetus, new ways of categorizing principles, and an entirely new approach. The human survival strategy, as a species, will ensure personal development. It will also create a new generation of questioning individuals-explorers. Let this book inspire you to explore. Jos Verheijen has been living in the southwest of The Netherlands for over forty-eight years. He worked as a psychiatric nurse and in care management in various Zeeland nursing homes. However, over a decade ago, he decided to focus on further studies and his writing. He still remains active as a head for the night shift. Meanwhile, this is his first series of philosophical essays.
