Christmas Summary Classics This series contains summary of Classic books such as Emma, Arne, Arabian Nights, Pride and prejudice, Tower of London, Wealth of Nations etc. Each book is specially crafted after reading complete book in less than 30 pages. One who wants to get joy of book reading especially in very less time can go for it. About The Book Camille Flammarion is one of the most remarkable of modern French scientists. Born on February 25, 1842, he was apprenticed at an early age to an engraver, but, attracted by astronomy, he studied so well that, when a lad of sixteen, he was admitted as a pupil to the Paris Observatory. There is no doubt that the great French mathematician, Le Verrier, regarded Flammarion with a certain disdain as more of a poet than an astronomer; but he soon vindicated, by several important discoveries, his title to be regarded as a man of science. *Urania*, which appeared in 1889, is an excellent example of his ability as a thinker, and of his charm as a writer. The work is hardly a novel, though it is far more popular than many books of fiction. It is really an essay in philosophy dealing with the question of the immortality of the soul; and it has an especial interest for English readers owing to the fact that much in it that seems to be pure fantasy is based on researches undertaken by the British Society for Psychical Research. The plot and the characters are of secondary importance; they are only used for the purpose of illustrating certain ideas.
